

Solar Energy South Africa

Adden energy Belize

DETAILS AND PACKAGING

1 USER MANUAL PDF

2 RJ45 Cable For RS485/CAN

3 Battery in Parallel Cables

4 RJ45 TO USB Monitor Cable

5 M8 Terminal*4

Overview

What is Adden energy?

Based on solid-state battery technology originally developed at Harvard, Adden Energy combines two technologies that have long been goals of the EV industry - lithium metal and fast charging. Lithium metal has the highest energy density of any battery material, offering longer driving range and lower costs than current batteries.

Where is Adden Energy headquartered?

Adden Energy is headquartered in Waltham, MA. What is the size of Adden Energy?

Adden Energy has 8 total employees. What industry is Adden Energy in?

Adden Energy's primary industry is Electrical Equipment. Is Adden Energy a private or public company?

Adden Energy is a Private company. What is the current valuation of Adden Energy?

.

Who is the CEO of Adden energy?

William Fitzhugh Ph.D is the CEO of Adden Energy. Where is Adden Energy headquartered?

Adden Energy is headquartered in Waltham, MA. What is the size of Adden Energy?

Adden Energy has 8 total employees. What industry is Adden Energy in?

Adden Energy's primary industry is Electrical Equipment. Is Adden Energy a private or public company?

How much is Adden energy worth?

The current valuation of Adden Energy is 000.00. What is Adden Energy's current revenue?

The current revenue for Adden Energy is 000000. How much funding has Adden Energy raised over time?

Adden Energy has raised \$5.15M. Who are Adden Energy's investors?

What makes Adden energy unique?

Adden Energy's unique battery technology originated from several critical discoveries made by a research group at Harvard's John A. Paulson School of Engineering and Applied Sciences.

How did Adden energy raise \$15m in a series a round?

To scale production and bring this technology to car manufacturers, the company has raised \$15M in a Series A round led by At One Ventures. "Current EVs work great for people like me - those with at-home charging whose driving consists of short commutes and an occasional road trip," explained Adden Energy Co-Founder and CEO Will Fitzhugh.

Harvard's 10-min charging solid-state EV battery gets funding boost

Harvard's 6,000-cycle EV battery that charges in 10 minutes gets funding boost. Adden Energy has developed a self-healing separator that prevents harmful dendrite growth, allowing their lithium

Team -- Adden Energy

Adden Energy was founded by a group of Harvard scientists and alumni. Professor Xin Li's research group at Harvard's School of Engineering and Applied Sciences first began studying solid-state batteries in 2015. Several impactful innovations on this topic have been discovered by the group since then, where doctoral students William Fitzhugh

5 ???· List of Adden Energy's institutional investors. At One Ventures, located in San Francisco (United States), made their first investment in Adden Energy on Aug 30, 2024 in its Series A round.; Primavera, located in Beijing (China), made their first investment in Adden Energy on Sep 01, 2022 in its Seed round.; Rhapsody Venture Partners, located in Cambridge ...

Technology -- Adden Energy

Adden Energy's technical advances have spanned materials design and synthesis, in-house solid-electrolyte development, and novel cell designs. These combined material and device innovations have enabled the demonstration of the technology with high-current-density lithium metal anodes as well as high voltage cathodes.

Adden Energy Raises \$15M to Expand Accessibility of Electric

...

Adden Energy has developed lithium-metal solid-

state battery technology that solves these issues. To scale production and bring this technology to car manufacturers, the company has raised \$15M in

Adden Energy Secures \$15M to Advance EV Batteries

Adden Energy's next-generation battery technology combines lithium metal and fast charging capabilities to address the limitations of current EV batteries. The company's solid-state batteries, originally developed at Harvard, utilize a self-healing separator to eliminate lithium dendrite growth--a primary cause of battery failure.

Adden Energy Secures \$15M to Scale Next-Gen Lithium-Metal

...

Adden Energy raises \$15M to scale lithium-metal solid-state batteries.. Self-healing technology eliminates dendrite formation and increases safety.. The batteries charge in under 10 minutes and offer up to 10x the lifetime of current EV

batteries.. Funding will support the construction of a pilot production facility in Waltham, MA.

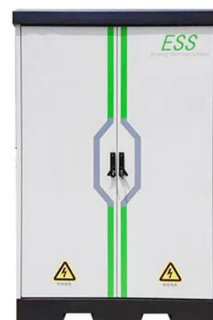

Adden Energy achieves breakthrough in solid-state battery ...

According to Adden Energy, the self-developed lithium metal battery achieves a charging time of only three minutes in the laboratory and a service life of more than 10,000 cycles. The prototype also has a high energy density and material stability "that overcomes the safety problems of some other lithium batteries".
