

Solar Energy South Africa

Afrykan power systems Zambia

Overview

How much electricity does Zambia use?

Zambia relies primarily on rain-fed hydropower generation for its consumption, which makes it vulnerable to changes in weather patterns. Zambia currently generates 2,800 megawatts (MW) of electricity, 85% of which is from hydroelectric source, while the rest is from fossil fuel and other sources.

What are the main hydroelectric power stations in Zambia?

Zambia's main hydroelectric power facilities are the Kariba North Bank Power Station (1,080 MW), Kafue Gorge Power Station (980MW), Kafue Gorge Lower Power Station (750 MW), Victoria Falls Power Station (108 MW), Lunsemfwa Hydro Power Station (56 MW), and the Itezhi Tezhi Hydro Power Station (120 MW).

Does Zambia have a private sector?

Although the power sector in Zambia is dominated by the state-owned utility ZESCO, there are pockets of private sector activity in generation, transmission, and distribution. The sector is opening up to new IPPs for on-grid and off-grid transactions.

How much solar power does Zambia have?

Zambia's installed solar capacity is 89 MW. Zambia has two utility scale solar power plants: French company, Neoen, and U.S. company, First Solar, own and operate the 47.5 MW Bangweulu Solar Power Station in Lusaka, of which the Zambian government holds a 20 percent stake through its Industrial Development Corporation (IDC).

[African Power Coal Ltd](#)

African Power Coal Ltd (APCL) is a Zambian
 company founded in 2016 with the aim of
 exploiting Zambia's natural resources, not
 limited to coal, copper, silver, zinc, tin and gold.
 APCL's main assets comprise of a number of
 mineral licenses held in Southern, Central and
 Copperbelt provinces of Zambia.

Zambia: Power purchase agreement signed for Ilute solar IPP

A PPA for the 25MW Ilute independent power
 project fits into Zambia's wider plan to use open
 access to become a regional hub for electricity
 trading. Offtaker Africa GreenCo will sell Ilute's
 power to a variety of customers by wheeling
 across national utility Zesco's transmission
 network and the Southern African Power Pool
 (Sapp)
