Als Junior Technisch Consultant bij Alliander ben jij de technische spil in het EIS (Enterprise Information Services) team, verantwoordelijk voor het ontwikkelen, onderhouden en optimaliseren van onze centrale informatiesystemen: OpenText Content Server en Microsoft SharePoint.

Procurement

We work daily to provide a reliable, affordable and sustainable energy supply. This is something we don't do alone but by building on the quality of suppliers, our partners in business. As well as supplying products and services, our suppliers also help us to pursue responsible business operations. Together, we can make the energy chain more transparent and sustainable.

Strategy

The government has agreed that the Netherlands must eliminate its harmful CO₂ emissions by 2050. To achieve this, Alliander's strategy. Our strategy is the roadmap for achieving our goal for 2030 and contributing to the 2030 and 2050 climate targets. Making the switch to clean energy is a major change.

Alliander

Alliander heeft in Nederland twee grote bedrijfsonderdelen: [1] Netbeheer: Liander (voorheen Continuon Netbeheer) is een Nederlands nutsbedrijf en netbeheerder dat het hoogspanningsnet tot 50 kV, midden- en laagspanningselektriciteitsnet en het gasnet in een deel van Nederland beheert. Dit is veruit de belangrijkste activiteit. Netwerkactiviteiten: Qirion (voorheen Liandon ...

Corporate social responsibility

For Alliander, doing business involves more than simply transporting energy throughout the Netherlands. We are working on a sustainable energy supply system in the Netherlands while at the same time improving sustainability in our own company. We feel responsible for our impact on the environment.

About Alliander

Alliander N.V. is an unlisted Dutch public limited liability company which is fully governed by the Dutch large companies ('structuurregime') regime (Article 2:158 to 2:164 of the Civil Code). This invests Alliander with a 'two-tier' management structure in which the Management and Supervisory Boards constitute two separate

entities.

Alliander

Alliander verlengt samenwerking Nginfra Met de symbolische uitwisseling van een fluitje, verrekijker, multitool, bidon, kompas en zaklamp bekrachtigden de beheerders van de 6 kritieke infrastructuren hun samenwerking in Nginfra voor de komende 5 jaar. Deze voorwerpen dienen als metafoor voor de opgave, focus en samenwerking die we met elkaar aangaan.

Alliander's activities contribute to achievement of the Sustainable Development Goals (SDGs) adopted by the member states of the United Nations in 2015. These seventeen Sustainable Development Goals aim to put an end to poverty, inequality, injustice and climate change by 2030. The Netherlands has also committed to achieving these goals.

Alliander invests EUR641 million over first half 2023

In the first half of 2023, network company Alliander again invested a lot more in expanding the gas and electricity grids. Alliander invested over EUR60 million more in the power grid over the first six months of 2023 compared to the same period last year. Despite the substantial

investments and the work being done, it is impossible to keep pace with the energy transition. ...

[Company profile](#)

As a network company, Alliander is responsible for the distribution of energy such as electricity, (bio)gas and heat. We don't produce or trade energy ourselves. This is done by energy suppliers, buyers and traders. Most of the energy we distribute regionally is produced by power stations and windfarms and carried through the international and domestic energy grids run by TenneT and ...

Alliander to accelerate flexibility management in the Netherlands

Alliander is to implement Siemens' Gridscale X platform to tackle key distribution grid management challenges. In particular, Alliander, a major network company in the Netherlands, intends to use the platform to reduce grid congestion and increase grid utilisation.. With this, the country's grid usage is anticipated to be extended by 10 to 30%.

[Alliander Jaarverslag](#)

The government has agreed that in 2050 there must be no more harmful carbon emissions in the Netherlands. To achieve this, we should

already be reducing our carbon emissions by 55% in 2030 compared to 1990, but 60% would be even better. Alliander's strategy. We performed a reappraisal of Alliander's strategy in 2023. As a result, we

Alliander invests record-breaking amount in energy networks, but ...

In 2023, the dire situation on the power grid in the Netherlands became really clear. The grid is under immense pressure and almost completely full. For the fifth year in a row, Alliander invested more than the year before in renovating its energy networks, with last year's investment amounting to more than EUR1.4 billion. More power stations and transformer stations ...
