# Aquarium anti-power-off energy storage power supply

## Overview

---

When installing an aquarium tank, your first concern was to keep the water oxygenated. This is the reason why you had to install filter pumps, powerheads and/or circulation pumps.

Ammonia toxicity, similar to “old tank syndrome” is one of the most fatal occurrences in aquariums. To prevent the spike of ammonia in an.

In an aquarium tank, pH fluctuation is due to factors relating to: 1. Adding highly acidic or basic water in the tank during cycling 2. Adding gravel made for marine tanks in your freshwater.
