Are female workers tired of installing photovoltaic brackets

Overview

Are women in the solar PV workforce?

The analysis outlines the share of women in the solar PV workforce, examines the barriers that women face in the sector - including women living and working in the off-grid context - and discusses the path to a more diverse solar PV workforce. See the visual story: [A Gender Perspective on Solar Employment](#).

Should women be involved in the rooftop solar workforce?

The low level of participation of women in the rooftop solar workforce underscores the importance of understanding the barriers that women face in this sector. With tremendous growth potential, the rooftop solar sector is at an opportune stage to focus on increasing women's representation in the workforce.

Do women install solar panels?

It's rare to see women installing solar panels on homes and businesses. Women currently make up one-third of the solar energy workforce and account for an even smaller fraction of solar installers— 5.5%.

What percentage of solar installers are women?

Women currently make up one-third of the solar energy workforce and account for an even smaller fraction of solar installers—5.5%.

Does rooftop solar power affect women's employment in India?

To date, the impact of the deployment of rooftop solar power on women's employment is weak in India, as suggested by the low gender ratio in this sector compared to other sectors. However, it has major growth potential, with multiple benefits for sustainable development and women's employment.

How can rooftop solar companies attract and retain women?

Initiatives like support groups, mentorship and guidance for current women employees that some rooftop solar companies already have in place could be introduced more widely to help attract and retain women within the sector.
