

## Solar Energy South Africa

# Armenia energy enterprise group

## Overview

---

Who is responsible for energy sector governance in Armenia?

The principal bodies involved in energy sector governance in Armenia include the Ministry of Territorial Administration and Infrastructure (MTAI), which is responsible for overall energy policymaking; the Ministry of Environment; the Public Service Regulatory Commission (PSRC); and the Committee on Nuclear Safety Regulation (ANRA).

What is Armenia's biggest energy consuming sector?

As Armenia's largest energy-consuming sector, buildings account for around 40 percent of electricity demand and more than 25 percent of gas demand. Significant market opportunities for increased efficiency exist, particularly in home heating. Ministry of Territorial Administration and Infrastructure.

Does Armenia have solar energy?

Armenia also has notable solar energy potential. The average annual amount of solar energy flow per square meter of horizontal surface is approximately 1,720 kilowatt-hours (kWh), which is high relative to an average European figure of 1,000 kWh.

Does Armenia have energy resources?

Armenia has limited energy resources and can meet only a fraction of the total demand for energy from domestic resources. Armenia does not have oil or natural gas reserves and is thus highly dependent on imported energy resources. It imports oil and petroleum products from Russia, Georgia, Iran, and Europe.

What are the issues affecting energy supply in Armenia?

However, issues related to energy supply, electricity market liberalization, and administration remain. Armenia has limited energy resources and can meet only a fraction of the total demand for energy from domestic resources.

Armenia does not have oil or natural gas reserves and is thus highly dependent on imported energy resources.

Is Armenia a member of the Eurasian Economic Union (EAEU)?

Armenia is also a member of the Eurasian Economic Union (EAEU), which aims to establish common EAEU gas and electricity markets by 2025. Armenia has sufficient electricity-generating capacity to meet current domestic needs, but electricity demand is projected to grow by up to three percent annually.
