Assemble your own rooftop photovoltaic panels

Overview

Can a DIY solar system be installed on a roof?

A DIY solar system can be installed on almost any type of roof. However, some roof types require much more effort than others, resulting in extra costs. For example, it is very hard to install solar panels on a regular wood-shingled rooftop.

Can you build your own solar panels?

To get straight to the point, yes, you can build your own solar panels, or at least partially, depending on the craftsmanship of each person. The process DIY includes sizing the solar panel system, choosing which components suits your needs, mounting and installing the solar panels, the solar inverter and safety disconnects.

Where can I buy DIY solar panels?

Several companies specialise in selling DIY solar panel kits to the public. Plug-in Solar is particularly easy to follow, and offers a wide range of kits and step-by-step DIY guides, plus accessories such as solar panel mounting kits. Renology, Select Solar and Sunstore Solar are also well worth a browse.

Can I install my own solar panels?

Yes, you can install your own solar panels. Sunstore Solar can provide professional installation, but we appreciate some people like to get stuck into a project. We designed our solar panel kits specifically for DIY solar panel installation projects. And what better project than providing energy security for your family or business?

How do you install solar panels on a roof?

Installing a solar system requires following a simple eight-step checklist as

follows: Erect your scaffold and make your roof safe: depending on your roof you may get away with a scaffold tower. You can skip this section if you're going for a ground installation. Add the roof anchors: solar panels won't stay up with gaffer tape.

How do you build a solar panel?

To build your own solar panel, you'll need to assemble the pieces, connect the cells, build a panel box, wire the panels, seal the box, and then finally mount your completed solar panel. Purchase the cells. There are a few different types of solar cells to buy, and most good options are either made in the United States, China, or Japan.
