Aurora's Grid is a Swiss Company actively
developing software to interface with Lithium-ion
battery system. Its main originality relies on the
battery lifetime extension (up to 40%) and on the
possibility of integrating multiple and
simultaneous services, such as peak-shaving,
renewable self-consumption, and frequency
control.

Aurora's Grid a mis au point un logiciel de gestion de l'énergie et de dimensionnement pour les systèmes énergétiques de batteries Li-ion. Le logiciel associe les connaissances électrochimiques approfondies des batteries Li-ion, les contraintes du réseau électrique et les techniques de prévision par apprentissage automatique.

Projects

Lausanne utility, Services Industriels de Lausanne, has financed via "Fond Efficacité Energetique" the development of Aurora's Grid 1.0. This project started on June 2016 and it is finishing on April 2018. The main results of this project are: the investment cost of a battery storage system can be reduced up to 20% while its ageing reduced
