Australia bmu battery

Overview

What is a battery management unit (BMU)?

Our Battery Management Unit (BMU) R is the 'brain' behind numerous motorsport and high-performance automotive batteries. This proven, powerful system is certifiable to ASIL C and provides flexibility through its immense computational capability. Our Battery Management Unit (BMU) X is a cost-effective yet powerful hardware platform.

How many battery modules can a BMU manage?

One BMU can manage up to 64 battery modules, over 980kWh of battery (when used with LVL's). One BMU is required per system and is the primary communications hub responsible for communications with the inverter system as well as direct battery connectivity to the web. The BMU is IP55 rated for use in both indoor and outdoor environments.

Does BMU need a power supply?

*BMU is powered by Battery Box through the network cable. No other power supply is needed.

BMSer

HipNergy is a battery management expert that is committed to becoming a world-class provider of solutions for the new energy industry. Based on BMS, we provide high safety, high reliability, high performance products and high quality services for energy storage, power, communication base station backup power, and laddering utilisation applications.

PURE ME BMS

High-voltage automotive-quality Battery Management Systems (BMS) in compliance with the highest safety (ISO 26262) and high-volume production quality (IATF 16949) standards. BMU BATTERY MANAGEMENT UNITS. Versatile and mature BMS platform with a broad function set for automotive, industrial and stationary applications up to 950V.

BMU Battery Management Unit OBC OnBoard Charger Regards Trex. Reply. H. Hypermiler Well-known member. Joined May 22, 2014 Messages 562 Location N Yorks, UK. Workshop manuals the BMU is small box down the back of the PHEV near the right rear wheel-well and a person in Western Australia has had his BMU replaced on his PHEV.

- Lifepo4
- Wide temp: -20°C to 55°C
- Easy to expand
- Floor mount&wall mount
- Intelligent BMS
- Cycle Life:≥6000
- Warranty :10 years

[Battery Management Unit](#)

This allows the HV battery pack to be fully floating from the vehicle chassis, as is required by most EV construction standards (eg NCOP14 in Australia). The remainder of the BMU operates relative to the GND supplied along the CAN bus connection, and this must be tied to the vehicle chassis at some point in the system.
