Choosing the Right Backup Generator for Your Home

Fuel is stored in an underground tank or supplied by your home's natural gas. Standby generators are larger than portable generators (7,500 watts to 48,000 watts or more), and they're more expensive, running anywhere from \$5,000 to more than \$25,000. Standby generators need to be professionally installed by a licensed electrician.

Whole House Generator Sizing Calculator [2024]

Whole house or home backup generators start at ~\$3,000 for a 10kW model and go up to around \$30,000 for a 150kW model. Most residential homes will need a 10-20kW generator. A popular

16,000 or 16kW whole house generator from Generac will put you back about \$4,200 (plus installation, which will cost several thousand dollars at a minimum).

Our Top Home Generator Picks You'll Want To Grab Now

A whole-home generator, or standby generator, must be connected to a transfer switch--which disconnects your circuit panel from the electrical grid before allowing power to flow through the circuits. Portable generators require you to initiate the power transfer manually. Those products require different safety precautions, including the often
