Battery sea container Nepal

Overview

Can You ship lithium batteries in an ocean container?

If the vehicle can be handled in a non-upright position, it must be secured in strong, rigid outer packaging. For many carriers, certain lithium batteries are totally off limits. Container shipping giant MSC recently reminded its customers that it won't ship lithium batteries in an ocean container if they've been used or damaged.

Where can batteries be shipped?

Batteries can be shipped on all main modes of transportation used in logistics: air, ocean, road, and rail. However, there are some different regulations and requirements depending on the mode of transport. Below we cover general guidelines applicable to all transport modes, but check the following dangerous goods regulations for specific info:.

Are lithium ion batteries safe to ship?

They're commonly used in hearing aids, wristwatches, smoke detectors and key fobs. Both lithium-ion and lithium metal cells and batteries are hazardous to ship, and they're subjected to roughly the same regulatory requirements depending on mode of transport (i.e., ocean vs. air).

How do you prepare a battery for shipping?

When preparing batteries for shipping, examine the Watt-hours rating, which indicates the battery energy capacity. Higher Watt-hour batteries require greater precautions. Check the State of Charge (SOC), which is the percentage of available power. IATA regulations say that for air transport, the SOC should never exceed 30%.

Are batteries allowed to be shipped?

However, they still require proper packaging and handling to avoid damage and potential short circuits. With regards to what batteries are not allowed to

be shipped, damaged or defective batteries should never be shipped due to the increased risk of safety hazards.
