# Belarus hark system

## Overview

---

What is Hark & how does it work?

Hark provides a way to see all of your assets, estate wide and contextualise that data for other stakeholders. Energy Managers, Facilities Managers and Asset Operators use a myriad of systems and tools including manual monitoring and intervention to optimise and track costs - from BMS systems, SCADA systems and utility information.

What is Hark technology?

Founded in 2016, Hark's technology enables enterprises to improve efficiency, reduce waste and maximise yield by connecting to, providing visibility of, and automatically controlling assets such as energy meters, building management systems and industrial systems.

Who uses the Hark platform?

Energy Managers, Facilities Managers and Asset Operators use a myriad of systems and tools including manual monitoring and intervention to optimise and track costs - from BMS systems, SCADA systems and utility information. The Hark Platform provides a single point of contact for all of that information.

What is Hark connect & analytics?

Hark Connect provides connectivity to industrial devices, assets and sensors on the edge, in the cloud and on-premises. Efficiently collating and streaming all of your asset data. Hark Analytics is software that visualises and contextualises operational data to make it usable and drive action.
