## Has anyone used the PECRON E2000LFP , DIY Solar Power Forum

I don't think any or very few companies have a wifi enabled solar generator. I know pecron has their E1500LFP (can't remember actual model) but it has wifi and built AC charger. It ships later in September though. I don't mind the external charging block since I charge by solar or if I am at home, charging block is fine. Efficiency appears good
