

Solar Energy South Africa

Best panels for solar French Southern Territories

Overview

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

The installation of solar panels on your French property is a tempting proposition for many owners, but the rewards are long-term, and it is not without risk. Thermal or Photovoltaic Solar Panels?

At the outset it is important to define the term 'solar panel' as there are two types of panels, which are frequently confused with one another.

Solar panel installations are increasing in France with the last year seeing over 200,000 installations across the country as prices fell. This includes installations from both professionals and from DIY kits, which allow homeowners to set up the panels by themselves.

As of January 1, 2014, the installation of solar thermal and photovoltaic panels is no longer eligible for tax credits. However, installations intended for self-consumption and resale (and not for pure sale) can give rise to an investment bonus or self-consumption bonus.

More and more companies are either selling, or installing, solar panels for people across France. This, coupled with rising energy costs, continues to make solar panels appear an attractive alternative to gas or electric energy sources, for both homeowners and businesses. Here we answer eight common queries about solar panel installation in France. Are solar panels a good option in France?
