Bluestem energy solutions Sweden

Overview

Who is bluestem energy solutions?

We are a team of dedicated professionals focused on providing customized renewable energy solutions that fit our customers' needs. As your partner, Bluestem Energy Solutions will get to know your unique situation and engineer the best strategy for you. What Our Valued Partners Have to Say.

Why should you choose bluestem?

Bluestem brings quality work due to their extensive experience and strong relationships, and they deliver with integrity. Bluestem's price, coupled with the value that we can receive through the sale of energy and wind attributes, such as the renewable energy certificates that we will receive from the project, will save money.

Why did Loup sign a wind power contract with bluestem energy?

Bluestem came along, and they were tenacious. They were willing to listen to our requests, what our concerns were, and negotiated how we could do those things together. Loup's venturing into a wind power contract with Bluestem Energy for locally produced wind power was a big and exciting move. I believe it was a prudent step into the future.

Solar Panel Recycling: New Methods Look Promising - Bluestem

The nano-silicon will be used to make high-energy anodes, which will be extremely useful in lowering the cost of battery materials. Several European projects to improve the recycling process of end-of-life solar panels have been backed by EU funding.

Business & Technology Advisory

Courtesy of Bluestem Energy Solutions. The wind turbine is connected in-front-of-the-meter to CCPPD's 8.2 MVA Northeast Wisner substation, which is less than a mile and a half away. A step-up transformer at the wind turbine's base converts the turbine's native 690 V to 34.5 kV. The 34.5 kV collection system utilizes the road right-of-way

Turbine to power homes in Seward

The project is a public-private collaboration between the City of Seward and Bluestem Energy Solutions. This new wind turbine will interconnect directly into the City of Seward's power distribution network with all the generated electricity being used locally. This project is expected to power approximately 600 homes in the vicinity.
