

Solar Energy South Africa

Brim energy Guinea

Overview

Three sources make up the in : , and . Biomass (firewood and) makes the largest contribution in primary energy consumption. It is locally produced, while Guinea imports all the products it needs. The potential for hydroelectric power generation is high, but largely untapped. Electricity is not available to a high percentage of Guineans, especially in rural areas, and service is intermittent, even in the capital.

What type of energy is used in Guinea?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important energy source in lower-income settings. Guinea: How much of the country's energy comes from nuclear power?

.

How has Kaleta changed Guinea's electricity supply?

Kaleta more than doubled Guinea's electricity supply, and for the first-time furnished Conakry with more reliable, albeit seasonal, electricity (May-November). Souapiti began producing electricity in 2021. A third hydroelectric dam on the same river, dubbed Amaria, began construction in January 2019 and is expected to be operational in 2024.

What is the potential for hydroelectric power generation in Guinea?

The potential for hydroelectric power generation is high, but largely untapped. Electricity is not available to a high percentage of Guineans, especially in rural areas, and service is intermittent, even in the capital city of Conakry . The estimated 2012 national consumption was 903 million kWh.
