## Overview

---

What is BTE renewables?

Actis set up the renewables platform in 2017 after it acquired the Kipeto wind project in Kenya in its development stage. In 2019, it expanded the platform with the purchase of BioTherm Energy, a South Africa-focused company, and rebranded it as BTE Renewables. BTE aims to develop utility-scale solar and wind projects across the African continent.

Why did BTE buy Engie?

With BTE's acquisition, Engie will benefit from an additional 340MW net of renewable operating assets in South Africa. These include 150MW in wind and 190MW in solar. The acquisition also includes a portfolio of more than 3GW in advanced development pipelines and projects, and a workforce of 80 professionals.

Is BTE a sustainable leader?

Today BTE is positioned as a highly valuable sustainability leader at the heart of Africa's Just Transition.
