

Solar Energy South Africa

Burundi Solar energy prices today

Overview

International Renewable Energy Agency (IRENA) statistics show that Burundi had just 9 MW of installed PV capacity at the end of 2023.

International Renewable Energy Agency (IRENA) statistics show that Burundi had just 9 MW of installed PV capacity at the end of 2023.

In this Burundi solar report, you will gain comprehensive insights into the statistics surrounding the solar production industry in Burundi.

Burundi: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Solar energy is the most common off-grid electricity source in Burundi, although the number of systems installed is very slow. With the global price dropping of solar technologies a small solar sector emerged in the recent years, that offer smaller systems for private households, businesses and public institutions.

Burundi is positioned to lead the region in solar energy development thanks to its abundant sunshine and untapped solar potential; the nation currently has roughly 17 MW of installed solar PV capacity.

Burundi Solar energy prices today

[Burundi's solar capacity to double](#)

President Ndayishimiye of Burundi announced plans to double the country's solar capacity at a ribbon cutting ceremony at the first solar field, which was financed by REPP. The 7.5MW field in Mubuga was the result of a multinational effort and has been providing more than 10% of nation's electric generation capacity since it was commissioned in 2021.
