Burundi Energy Situation

Burundi`s energy consumption relies to a great extent on biomass. Households are the main consumers of energy in the country, accounting for 94% of total consumption. Their needs are almost exclusively met by traditional biomass (99%). Electricity (0.3%), and oil products (0.4%) play an insignificant role. If industry and transport is included

Empowering Communities with Reliable Energy

Burundi Energy Corporation (BEC) is tackling these critical challenges head-on. Through our landmark initiatives--including large-scale solar power plants, solar streetlight installations, and community power hubs--we are committed to delivering clean, reliable, and affordable energy solutions across the country.
