# Burundi safe energy limited

## Overview

---

Wood, as firewood or charcoal, is the main source of energy for cooking in Burundi, and accounts for 95% of the country's energy consumption. A 2021 report noted that at current rates of forest clearance Burundi would have no forest cover left in 25 to 33 years.

The Republic of is a in the region of . During the colonial period most large companies were owned and run by Europeans, and operated under concessions from the colonial government. After independence in 1962, the state took over operations of several of the companies. Subsequently the state founded a number of state-owned companies to handle specific sectors of the economy, such as sugar, cotton, textile.

Should Burundi wait 25 years to get electricity?

Seeing thousands of people walk the streets, the commerce and noise of a bustling city, clearly illustrates how access to clean and affordable energy is crucial for the development of Burundi. The rural population and its children should not wait for 25 years to have access to electricity.

What is the UNICEF Burundi Innovations Lab?

Since its creation in 2012, the UNICEF Burundi Innovations Lab has made energy a key focus of its portfolio. In a country where only 3% of the population has access to the national electricity grid, the need to provide safe, clean and low-cost energy solutions is urgent.

Does Burundi have electricity?

Burundi's access to electricity (6%) is one of the lowest in Sub-Saharan Africa, even-though the country's cost of generation (0.062 USD/kWh) is considered relatively low as compared to its neighboring countries.

How much power does Burundi have?

Furthermore, Burundi has only 39 MW of installed capacity, of which 95% is hydropower-based, and significant renewable energy potential still to be tapped.

How can UNICEF help Burundi use its energy resources?

In this sense, UNICEF has a unique ability to act as a convener between different actors in the field of energy, and encourage private sector investors, creating an enabling environment through policy change and awareness campaigns, paving the way for Burundi to fully utilize its energy resources.

How does energy poverty affect Burundi's development?

The wide-ranging impact of energy poverty on Burundi's development drove our team to develop a Decentralized Rural Electrification Strategy, which aims to promote the use of off-grid renewable energy from household to policy level.
