During the presentation of the project, Cape Verde's National Director for Industry, Trade and

Energy, Rito Évora, announced that the energy storage centre is scheduled to be operational by 2030, with the aim of ...

Lusa

Praia, Sept. 6, 2024 (Lusa) -- Cabo Verde's first pumped storage hydroelectric power station will start operating by 2028. Its power output is equivalent to more than a quarter of the largest (fuel-fired) power station on the island of Santiago. For example, wind energy produced at off-peak times (i.e. at night) will pump water back into

National Power Sector Master Plan 2017 - 2040, Cabo Verde

Another challenge is the fact that the country's dry climate is prone to drought and 90% of its drinking water is obtained through a desalinization process which consumes around 10% of the country's total energy production. The Government's objectives for the power sector were presented in a number of documents, which were elaborated in

Studio Ma releases renders of new U.S Embassy in Cabo Verde

Arizona-based practice Studio Ma has unveiled renders for a new U.S. Embassy building in Praia, the capital city of Cape Verde, a small

archipelago nation off the coast of West Africa.
