CABO VERDE: Managing energy and water as an island state

The island state, Cabo Verde, also known as Cape Verde, relies heavily on imported thermal energy for its power supply and the energy-intensive process of desalination for clean water. Consisting of a cluster of 10 islands in the Atlantic Ocean, it is well known for its white sandy beaches, dry tropical climate and unique culture, influenced by

Cabo Verde

Cabo Verde is an archipelago composed of 10 islands that witnessed a consistent increase in both energy access and renewable energy

sources in recent years. The most current data presented in the country's Action Agenda states that over 90% of the population has access to electricity, while over 70% of the population had access to clean

Cabo Verde

Cabo Verde's renewable energy production has seen a steady increase, reaching 18.3 percent in 2020 and 19.6 percent in 2021. The country is currently developing 40 MW of solar and wind capacity and has installed 6 MW of distributed generation within the past five years. Code includes a preference for goods, services, and practices that

A partir desse momento, a ACER passou a ser oficialmente integrada por oito empresas cabo-verdianas do sector das energias renováveis, são elas as Associadas da ALER, Águas de Ponta

Preta e a Cabeóica, juntamente com o Centro Competências Cabo Verde - CDC 3C, a ARES - Atlantic Renewable Energy Solutions, o CERMI - Centro de Energias

National Power Sector Master Plan 2017 - 2040, Cabo Verde

Solid waste can also represent an adequate option while ocean and geothermic energy are being tested, with uncertainties remaining as to their efficiency. Cape Verde has an estimated potential of 2,600 MW of renew-able energy, and more than 650 MW have been studied in concrete projects, which have lower production costs than fossil fuels.

Pioneering Sustainable Energy Solutions Since 2011

Our inclusive culture creates a platform for people around the world who share the same vision to work with us and partner up to build a clean energy future. Cabo Verde Competence Center

Facilitate the energy transition in Cabo Verde and in the ECOWAS and PALOP regions. CdC 3C is a promoter of sustainable solutions at one-stop shop that combines strategic advice and innovation for the energy transition with the particularity of being a center of skills for professional training. This combination allows the adaptation of

Elevating Biomass Energy with SERVODAY's Torrefaction Plant

SERVODAY's Torrefaction Plant revolutionizes biomass energy in Cabo Verde by converting raw materials into high-energy torrefied products. The process starts with receiving and initial processing of biomass, followed by controlled heating in the torrefaction reactor to enhance energy density and storage properties. The torrefied biomass is then cooled and stored for ...
