

Solar Energy South Africa

Can photovoltaic panels be bought out now

Overview

Before we get into the nitty gritty it is worth considering what the pros and cons are when it comes to buying a property with solar panels installed. Solar electricity is a low carbon, renewable energy – and according to the Energy Saving Trust a typical home solar PV system could save around one tonne of carbon per year.

Getting a mortgage on a property with leased solar panels can sometimes be problematic. The issue is that a large proportion of the roof is.

One of the first questions you will want to find out when looking to buy a property with solar panels is who owns them. If the vendor owns them outright, then it is unlikely you'll run into any.

As we've mentioned, it can be a little more complicated buying a property with solar panels that are leased – not to mention when you are looking to get a mortgage. There are several things.

In a nutshell – the government's feed-in tariff (FIT) scheme offered cash payments to households that produced their electricity using renewable technologies, such as solar PV panels or wind turbines. FIT payments are made.
