

Solar Energy South Africa

Can solar panels be sold for money

Overview

You need to have a renewable electricity generating system that meets the SEG eligibility requirements. You must have a meter capable of providing half-hourly export readings. This would typically be a smart meter. Speak to your energy supplier about getting a smart meter installed if you do not already have one.

You need to apply directly to a SEG tariff supplier to get paid. The OFGEM website lists the energy suppliers that provide SEG tariffs. Your SEGtariff supplier does not need to be the same as the supplier that provides your energy.

Use the Energy Saving Trust calculator to estimate: 1. how much you could save from solar panels or other renewable electricity generating.

Can you sell solar energy back to the National Grid?

Householders and businesses with solar panels installed, who generate more renewable electricity than they need, can sell energy back to the National Grid under the Smart Export Guarantee (SEG). An increasing number of people are now benefiting from this government-backed initiative, and you could be one of them.

Why do energy suppliers buy solar panels?

Energy suppliers buy them to show that the electricity they sell is renewable. Called FIT REGO Boost, Good Energy estimates that a 3kW rooftop solar array could earn around £10 a year from the scheme. Find out more about Good Energy's scheme. Which companies have Smart Export Guarantee tariffs?

.

Should you sell unused solar energy?

Storing can lead to cost savings, increased energy independence, reduced carbon emissions, and improved efficiency. On the other hand, selling unused electricity can earn homeowners money, further reducing carbon emissions and contributing to grid stability. How do you Maximise your Solar Panel

Renewable Energy?

.

Do solar panels save money?

Selling electricity back to the grid is by no means the only benefit of solar panels. According to the Energy Saving Trust, solar panels were cutting home energy bills by up to 70% in 2023. How much money you'll save depends on the size of your solar system and how much electricity you use.

Can you sell solar power in the UK?

This method of selling solar power was introduced by the UK Government in 2010 to promote the uptake of renewable energy. Homeowners and business owners who installed renewable technology could get paid for all the energy generated if they were registered with a provider under the scheme, whether used by them or not.

How much will I be paid if I sell solar power?

The amount you'll be paid for selling solar power back to the National Grid through the Smart Export Guarantee will vary depending on the tariff you choose. It could be between 1p/kWh to 24p/kWh – the best rate available at the time of writing. Rates do change, though, so it's always worth looking at the latest tariffs.
