Canada's emission reduction targets look hard to reach

However, Canada's embrace of wind and solar has been limited, and a lack of common policy direction between federal and provincial governments suggests a regionally uneven energy transition. Impacts. The expansion of the country's LNG industry will lock Canada further into the international trade in hydrocarbons.

Climate change energy futures

in business, industry

1. Introduction. The World Economic Forum's top risks include failure to mitigate and adapt to climate change, biodiversity loss and ecosystem collapse and natural disasters from extreme weather (World Economic Forum, 2023). Climate change impacts (including increasing frequency and intensity of drought and flood) are projected to worsen ...

[Canadian Solar - Global](#)

Dr. Shawn Qu, Chairman, President and Chief Executive Officer founded Canadian Solar (NASDAQ: CSIQ) in 2001 in Canada, with a bold mission: to foster sustainable development and to create a better and cleaner earth for future generations by bringing electricity powered by the sun to millions of people worldwide. Under Dr. Qu's leadership, we have grown into one of the ...

A novel integrated approach for ranking solar energy

Then, a novel integrated technique is developed to prioritize all the alternatives. In this study, ten provinces in Canada are evaluated for the construction of solar power plants. The new hybrid approach composed of data envelopment analysis (DEA), balanced scorecard (BSC) and game theory (GT) is implemented to rank the nominated locations
