Overview

Is Cayman ready for renewables?

The goals to introduce renewables into Cayman's energy mix are lofty but progress is slow. In 2019, CUC generated just under 700 gigawatts of energy, but only about 2.6% of that came from renewable sources.

What is Cayman's energy plan?

This plan, drafted in 2017 by Caribbean Utilities Company and approved by the regulator OfReg, aims to meet both the islands' energy needs and the climate goals of the National Energy Policy, which called for 70% of Cayman's energy to come from renewables within 20 years.

Is Cayman the perfect place to harness solar energy?

Significant improvements are being made in the solar energy industry every year and Cayman is the perfect location to harness the power of the sun. Solar energy can be harvested in two ways: solar photovoltaic (PV), which converts sunlight into electricity and solar thermal, which heats water.

Are solar panels duty-free in Cayman?

However, renewable energy equipment, such as solar panels, are in fact duty-free for residential homeowners. Although Cayman enjoys over 300 days of sunshine, you will need to consider an alternative source of power should there be no sun. One such option is the Tesla Powerwall battery.
