Chile terranova energy

Overview

Who is Terranova Green Energy Private Limited?

Terranova Green Energy Private Limited is your premier destination for cutting-edge energy solutions. We specialize in the manufacturing and marketing of high-quality Lithium batteries/Lithium inverters, Solar Battery Packs, Solar PCU, Industrial UPS, Material Handling Equipment Battery, and Energy Storage Systems.

Will Chile replace coal plants with solar thermal plants?

As coal plants are eliminated, Chile intends to replace them with solar thermal plants or convert them into batteries like the Alba Project. The solar thermal tower Cerro Dominador has become a symbol of Chile's energy revolution against climate change.

Does Chile have a solar thermal tower?

Chile's Atacama desert is home to the only solar thermal tower in Latin America. The imposing 240-meter construction is one of the pillars of the country's ambitious green energy program that began in 2019 and aims to completely replace fossil fuels by 2040.

Is there an alternative to solar energy in Chile?

Chile has begun to explore an alternative. Both Cerro Dominador and the Alba Project are powered by so-called solar salts, extracted from the Atacama Desert, composed of potassium nitrate and sodium nitrate. When melted and kept in a liquid state, they allow energy to be stored.

Will Chile achieve net-zero emissions by 2050?

Last December, Chile's centre-right government published the country's first energy transition strategy, which provided targets for achieving net-zero emissions by 2050, including accelerating solar, wind and geothermal energy across the country.

How does Chile benefit from solar energy?

The country benefits from consistently strong winds in mountainous region of Patagonia and some of the world's highest levels of solar radiation in the Atacama Desert. This predictable supply of wind and solar energy has led the Chilean government to estimate that 13% of the world's green hydrogen will be produced within its borders.
