China National People's Congress Representatives New Energy Storage

Overview

How big is China's energy storage capacity?

China's installed new-type energy storage capacity had reached 31.39 gigawatts by the end of 2023, the National Energy Administration (NEA) said on Thursday. Last year alone, 22.6 gigawatts of such capacity was installed, which was more than 3.6 times the figure at the end of 2022 and nearly 10 times that at the end of 2020.

Why is China's energy storage capacity rocketing?

BEIJING, Jan. 25 -- China's energy storage capacity is rocketing to facilitate the utilization of growing renewable power amid the country's efforts to pursue low-carbon development. China's installed new-type energy storage capacity had reached 31.39 gigawatts by the end of 2023, the National Energy Administration (NEA) said on Thursday.

How will the NEA improve China's energy storage capacity?

The NEA said it will actively strengthen planning, improve standard systems and refine the market mechanism to promote the high-quality development of new-type energy storage. China's energy storage capacity is expanding to facilitate the utilization of growing renewable power amid the country's efforts to advance its green energy transition.

Is China's power storage capacity on the cusp of growth?

[WANG ZHENG/FOR CHINA DAILY] China's power storage capacity is on the cusp of growth, fueled by rapid advances in the renewable energy industry, innovative technologies and ambitious government policies aimed at driving sustainable development, experts said.

Why is China's energy storage capacity expanding?

BEIJING, July 31 -- China's energy storage capacity is expanding to facilitate the utilization of growing renewable power amid the country's efforts to

advance its green energy transition.

What does Zhong Zheng say about power storage?

Zhong Zheng, a deputy to the National People's Congress, says development of new types of power storage will be of great importance to the high-quality development of the manufacturing sector as China demands more flexible adjustment power capacity. [Photo provided to chinadaily.com.cn]
