

## Solar Energy South Africa

# China solar companies in netherlands

## Overview

---

Where do Dutch solar panels come from?

Approximately 60 percent of Dutch solar panel imports is destined for other countries, mostly within the EU. Around 40 percent is thus installed in the Netherlands, or stored for later use, either in the Netherlands or abroad. The Netherlands not only trades a lot of Chinese solar panels, but also has a large number in use.

What is the largest solar installation in the Netherlands?

2016 The largest solar installation in the Netherlands, the 6 MW array at the Wadden-Island Ameland was officially opened in June 2016. Installed capacity per capita rose to 120.1 W, thirteenth position in the EU and nearer to the EU average of 197.8 W than in preceding years.

Which countries import solar panels from China?

Germany imports relatively few solar panels directly from China. The majority were Chinese solar panels re-exported by the Netherlands. Spain is the fifth largest importer, but gets more panels directly from China compared to Germany. Between 2021 and 2022, the value of Dutch solar panel imports more than doubled.

What percentage of Dutch solar panels are re-exported to other countries?

Roughly 60 percent of the imports are re-exported to other countries. Statistics Netherlands (CBS) reports this in connection with the publication Dutch Trade in Facts and Figures 2023. The total value of Dutch solar panel imports was 11.9 billion euros, making the Netherlands the largest importer in 2022.

Why is China a major supplier of solar panels?

China is not only the largest supplier of solar panels, but also of other transitional goods that are crucial for the green transition in the Netherlands,

Europe and the rest of the world. For example, China is a major producer of lithium-ion batteries, an essential component of electric cars.

Which country uses the most solar panels?

The Netherlands not only trades a lot of Chinese solar panels, but also has a large number in use. Among the EU countries, the Netherlands had the highest installed solar capacity per capita in 2022. In addition, the Netherlands generated the largest share - 14 percent - of electricity using solar power. This is slightly more than Spain.

## China solar companies in netherlands

---

### A green expansion: China's role in the global deployment and ...

The global financial crisis was a turning point, leading the government to introduce many domestic stimulus policies that benefited China's struggling solar companies. As a result, China is now by far the leading country in installed solar capacity, installing 43 GW in 2018 and 29 GW in 2019, bringing the total national capacity to about 205 GW

### [Europe hoarding Chinese solar panels](#)

The imports are heading to several key destinations, including the Netherlands, Spain, Germany, Poland, France, Greece, Italy, and the UK. The Netherlands was the standout leader in Chinese PV imports in 2022, bringing in almost 45 GWdc alone, more than ten times the amount of panels installed domestically across the year.
