[Subscription Terms & Conditions](#)

Read Odyssey Energy Solutions Subscription Terms & Conditions to understand the agreement between the company and its customers for using its solar-related project planning, pricing, and technology services. Learn about acceptance, definitions, and important terms like License Term, Order Form, and Intellectual Property Rights. Effective from 4/1/2023, read on for more details.

[Latest Insights & News](#)

Stay up-to-date with the latest renewable energy news, insights, and case studies from Odyssey Energy Solutions. Explore topics such as distributed renewable energy finance, remote monitoring and control, procurement solutions, energy access, rural electrification, and more. Discover how Odyssey Energy Solutions is unleashing distributed renewable energy.

Originate, Evaluate & Monitor DRE Portfolios

Odyssey Energy Solutions offers a suite of project planning modules to curate standardized portfolios of renewable energy projects developed by top companies in growth markets. Evaluate portfolios with automated benchmarking and connect directly to operating assets to manage your investments efficiently. Stay up-to-date with the latest news in private capital and distributed ...

[Crossboundary Energy Access](#)

Crossboundary Energy Access (CBEA) is managing its growing portfolio of mini-grid investments using Odyssey's asset management platform. Learn how CBEA and Odyssey partnered to solve unique challenges of off-grid distributed ...

UEF Zambia Energy Demand Stimulation Incentive (ZEDSI)

The ZEDSI programme is a targeted results and performance-based incentive to stimulate sustained energy utilisation, through productive uses of energy in agri-value chains, businesses, public institutions and households, leading to

rural development, improved revenues and commercial viability of mini-grid projects, with welfare impact for over a hundred thousand ...

[P-RECs Financing](#)

Innovative Finance: Energy Peace Partners is developing the Peace Renewable Energy Credit (P-REC) as a new financing solution that will accelerate the transition to renewables in conflict-affected settings. PRECs monetize renewable energy generated in fragile states in order to meet increasing corporate commitments to sustainability and social responsibility. This extends ...

Promoting Economic Growth: Productive Use Business Models for ...

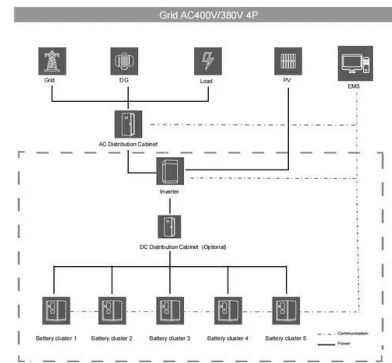

REA Nigeria Announces the Mini-Grid

Odyssey Energy Solutions 2023 year in review

Here at Odyssey we pack A LOT into one year. Our company mission is ambitious - to scale the distributed renewable energy (DRE) sector by being the technology backbone for every phase of project development. This means connecting solar companies to finance, helping them procure equipment, and providing tools to streamline project operations and maintenance. December ...

Acceleration Scheme winners. The Mini-grid Acceleration Scheme (MAS) results have been released by the Nigeria Rural Electrification Agency (REA). Odyssey has partnered with the Nigeria Electricity Sector Program (NESP) to host the MAS tender, which aims to promote productive use business models for mini-grids electrifying ...

Ateess Power and Odyssey Procure Partner to Revolutionize Energy ...

Odyssey Procure and Ateess Power have joined forces to provide affordable and accessible battery energy storage systems (BESS) to address the energy storage challenges facing the renewable energy sector in Africa. This partnership aims to deliver the lowest possible price for BESS technology, making renewable energy accessible and affordable to as many people as ...

Optimizing energy production to get to net-zero, a case study

...

When Zhyphen began their work with Barra, the island had already begun its net zero journey, having installed a community wind turbine, a number of solar installations, and EV charging. Zhyphen's first project was to get a deep understanding of how much energy is being generated by each system and how much energy is being used to power the

**Home Energy Storage
 (Stackble system)**

- High Efficiency
- Easy installation
- Safe and Reliable
- Perfect Compatibility

- Product Introduction**
- Scalable from 10kWh to 50kWh
 - Self-Consumption Optimization
 - Integrated with inverter to avoid the compatibility problem
 - LFP battery, safest and long cycle life
 - Stackable design, effortless installation
 - Capable of High-Powered
 - Emergency-Backup and Off-Grid Function
