Energy in South Korea

Yongpyeong wind farm. South Korea is a major energy importer, importing nearly all of its oil needs and ranking as the second-largest importer of liquefied natural gas in the world. Electricity generation in the country mainly comes from conventional thermal power, which accounts for more than two thirds of production, and from nuclear power. [1]Energy producers were ...

This year's edition focused on the role [...]

Understand low-carbon energy in Colombia through Data , Low ...

From August 2023 to July 2024, Colombia's electricity generation showed a strong reliance on low-carbon sources, providing more than 60% of the nation's electricity. The lion's share of this came from hydropower, which alone constituted approximately 57% of the total. Solar made up a small but noteworthy segment of 2.5%, followed closely by biofuels contributing just over 2%.
