Cabo Verde to host the Ninth Conference on Climate Change

...

Praia, Cabo Verde and Online, 15th April 2021 - The Ninth Climate Change and Development in Africa (CCDA-IX) Conference will be held in Sal Island, Cabo Verde from 23rd to 27th August 2021. This was announced today by H.E. M. Olavo Correia, Vice Prime Minister and Minister of Finance in Cabo Verde, UNECA officials, and the Climate for

[Cape Verde Renewable Energy Atlas](#)

The project was a huge success and to this day remains one of the most important and influential strategic studies in the energy sector of Cape Verde. The Renewable Energy Atlas includes the strategic identification of resource potential, location and analysis of the solar, wind, pumped-storage, geothermal and wave resources, and resulted in

ECREEE

The ECOWAS Sustainable Energy Forum (ESEF) is one of the largest energy events in West Africa. It was initiated in 2016 by the ECOWAS Centre for Renewable Energy and Energy Efficiency (ECREEE) to support investments in sustainable energy anchored on ambitious policies on the part of ECOWAS Member States.

The government of the Republic of Cabo Verde, the European Union and the EIB have signed financing of EUR300 million (\$330.6 million) for the country's energy, digital and port sectors; more than half will go to building a grid, generation and energy storage system up to ...

National Power Sector Master Plan 2017 - 2040, Cabo Verde

Solid waste can also represent an adequate option while ocean and geothermic energy are being tested, with uncertainties remaining as to their efficiency. Cape Verde has an estimated potential of 2,600 MW of renewable energy, and more than 650 MW have been studied in concrete projects, which have lower production costs than fossil fuels.

Cabo Verde

Cabo Verde's renewable energy production has seen a steady increase, reaching 18.3 percent in 2020 and 19.6 percent in 2021. The country is currently developing 40 MW of solar and wind capacity and has installed 6 MW of distributed

generation within the past five years. In addition, the first MW of battery energy storage has become operational.
