Cubic modular system Chile

Overview

What is a cubic modular system?

The versatility of the modular system makes it easy and quick to assemble and install electrical panels as well as to extend and/or modify existing panels - including older enclosures. The CUBIC modular system provides numerous possibilities for construction of tested panels.

Why should you choose cubic modular?

Whenever the need for a safe and efficient power distribution is needed, the CUBIC Modular system is the answer. The modular thinking behind our signature enclosure system makes it possible to build every type of switchboard solution in the low-power segment, based on several standard parts, without compromising on quality.

How big is a cubic module?

The main module of the CUBIC modular system is 192 mm, which is remarkable for being divisible by 12 figures without decimals. During the construction of a panel, logical main and sub modules are used so that the fitter need not take millimetres into consideration. All fitting is done by means of only very few tools.

What is a modular switchboard?

The modular system can be used in many situations, where electrical switchboards are a necessity to ensure the operation of electrical equipment. Depending on the end user's requirements CUBIC offer several options based on the modular system. For example, Multi Drawer, Plug-in, MPI inserts Cu-mini.

What is a modular busbar system?

The modular system is supplied in parts. Using a relatively few standard parts, it is possible to build enclosures in bespoke sizes and models. CUBIC's type-

tested busbar systems consist of standard components and cover a range up to 8750 Amps.

What is modular system?

The Modular System is extensively tested by leading and independent test laboratories. This ensures a high validity of our assertions and ensures a documentation and independency, on which all stakeholders can rely. The Modular System is verifiable according to the IEC/ EN 61439 standard.

Cubic modular system Chile

Modular System for Low-Voltage Switchboards

CUBIC's design software is Galaxy, which allows for the conduction of temperature-rise calculations to ensure proper and easy construction of switchboards. The company's modular solutions are all supplied worldwide to ...

Electrical components

Electrical components One of our key focuses is adding value to our Partners' businesses. With our range of electrical components, we provide added value through safety, increased competitiveness and easy mounting. As with everything we do, our range of electrical components is thoroughly tested in the Modular System. CUBIC offers five types of electrical components: [...]

Main switchboards

Main switchboards Highest safety, quality, efficiency and endurance. When these qualities are required for electrical power distribution, an electrical switchboard solution from CUBIC is the ideal choice. Read more Main switchboard built in the Modular System Any main switchboard designed in the Modular System, offers an infinite opportunity for effective power distribution up to 6300 ...

Rockwell Automation

Announces Intent to Acquire CUBIC

About CUBIC. CUBIC was founded in 1973 based on a unique idea of a modular system for the construction of electrical panels. This idea has since the early start developed CUBIC into a global and recognized partner within electromechanics and with a product range that comprises any type of enclosure.

Modulair systeem

Wanneer een veilige en efficiënte stroomverdeling nodig is, is het CUBIC Modular systeem het antwoord. Het modulaire denken achter ons kenmerkende behuizingsysteem maakt het mogelijk om elk type schakelbordoplossing in het low-power segment te bouwen, op basis van verschillende standaardonderdelen, zonder afbreuk te doen aan de kwaliteit.

CUBIC Modular System Enclosures , Rockwell Automation

Design systems that best fits your plant - CUBIC Modular System is brand agnostic; No need to over design. Best-fit engineering combined with multiple power input locations; Cut accreditation time - CUBIC Modular Systems are tested and verified by ...

CUBIC-Modulsystem A/S

CUBIC-Modulsystem A/S , 8.421 følgere på LinkedIn. The Power of Modular Thinking. , CUBIC was founded in 1973 based on a unique idea for a modular system for the construction of electrical panels. This idea has since the early

start developed CUBIC into a global and recognized partner within electromechanics and with a product range that comprises any type ...

Low Voltage CUBIC Modular System

Four Key Concepts of the CUBIC Modular System:

1. Power of Modularity: CUBIC's innovative modular approach offers the flexibility to meet your most demanding specifications.
2. Independence: The brand-agnostic approach sets CUBIC apart in the marketplace, and allows it to serve the entire market.
- 3.

Products

Products CUBIC's product programme consists of the five following areas: Modular System switchboards, standard and customized enclosures, CPS25, Cu-flex busbar connections and electric components & switchgear. The CUBIC Modular System is based on a concept of standard modules in steel for the construction of electrical switchboard systems up to 6300A. These ...

Cubic Solutions

The NHP CUBIC Modular System is based on the concept of efficiently using standard parts to construct a tailored switchboard to achieve your individual project requirements. The system is independently tested for verification to IEC 61439, making all documentation directly

applicable to AS/NZS 61439 'Original Manufacturer' verification

Modular System for Low-Voltage Switchboards

The basis of the CUBIC Modular System has a main module size of 192mm. This unique dimension ensures a maximum of versatility and enables an enclosure, which can be customised to meet individual requirements and demands from ...

Tableros Cubic Modular Systems: Flexibilidad y ...

Risoul y Cubic Modular Systems. La flexibilidad y adaptabilidad de los tableros Cubic Modular Systems ofrece una solución versátil y eficiente para la distribución eléctrica en diversos entornos. Estos tableros permiten ...

TAX FREE

Product Model
 HJ-ESS-215A(100KW/215KWh)
 HJ-ESS-115A(50KW 115KWh)

Dimensions
 1600*1280*2200mm
 1600*1200*2000mm

Rated Battery Capacity
 215KWH/115KWH

Battery Cooling Method
 Air Cooled/Liquid Cooled

Rockwell Automation Completes Acquisition of CUBIC

About CUBIC. CUBIC, a Rockwell Automation Company, was founded in 1973 based on a unique idea of a modular system for the construction of electrical panels. This idea has since the early start developed CUBIC into a global and recognized partner within electro

mechanicals and with a product range that comprises any type of enclosure.
