Czechia solar system inc

Overview

How many solar power plants are in Czechia?

A total of 82,799 solar power plants were connected to the grid in Czechia last year. Image: CEZ Group Czechia recorded a significant increase in installed solar capacity last year, with about 970MWp of capacity added to the grid. However, the growth was mainly driven by household rooftop solar, according to the Czech Solar Association.

How many solar power plants did Czechia build in 2023?

Czechia built around 1 GW of new PV plants in 2023, according to data from the Czech Solar Association (Solární Asociace). In total, 82,799 solar power plants were connected to the grid, with a combined total output of 970 MW. The nation achieved a record-breaking year with 145% growth, connecting 49,000 more power plants than it did in 2022.

Why is the solar market growing in Czechia?

The figures mark a period of rapid growth in Czechia's solar market. The growth has been largely driven by residential PV, with most of the new installations (80,069) being domestic PV plants, supported by the country investing an additional CZK 55 billion (\$2.5 billion) in its New Green Savings program back in March 2023.

Is a solar park a new start for Czech PV?

Although relatively small in size, the completion of the solar park represents a new beginning for Czech PV, as utility scale PV projects have been banned for years from the country's energy landscape and solar was also excluded by the planned auctions for large scale renewables.

Will Czech solar projects be financed through a PPA?

"There are more large scale projects under development in Czechia, that are hoping to be financed through the modernisation fund that was announced

this year,” Jan Krčmář, chairman of the Czech Solar Association, told pv magazine. “These projects will need to secure a PPA, as there are no auctions or other incentives for new solar power plants.”.

Is the PPA market a bottleneck in Czechia?

According to him, however, the PPA market is currently one of the main bottlenecks in Czechia, which the association has been warning about for years. “New large projects will receive capex subsidies, but will otherwise have to find a commercial off-taker,” Krčmář explained.
