Dan energy Slovenia

Overview

Slovenia, both as an independent party and a member of the , signed the in 2016. The European Union Nationally Determined Contribution (NDC) towards climate goals includes Slovenia. In the December 2020 update to the European Union NDC, Slovenia committed to the common goals and to reduce its emissions from outside of the by 15% from 2005 levels by 2030. For comparison.

How much energy does Slovenia produce?

Slovenia generated 68.8% of its electricity with zero carbon or carbon neutral sources in 2019, dominated by nuclear power and hydroelectricity. Fossil fuels oil, coal, and natural gas contributed 61% of the total energy supply of Slovenia in 2019.

Who is Dan-tech energy?

Dan-Tech Energy, with decades of battery technology experience, offers a complete range of products and services for drones, robotics, portable energy applications, e-mobility and other OEM equipment manufacturers that will fit perfectly to your application.

What are the different types of energy transformation in Slovenia?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Slovenia for 2022. Another important form of transformation is the generation of electricity.

How many wind turbines are there in Slovenia?

A solar power plant with a capacity of 6MW opened in 2023 at Brežice, linked to the hydro power plant. Slovenia had just 2 wind turbines in 2022. Onshore wind energy potential for Slovenia is typical of central and eastern Europe.

Does Slovenia have natural gas?

Slovenia has essentially no natural gas or petroleum reserves or production.

The possibility of a gas pipeline with Hungary has been proposed for years, a pipeline exists to the border with Hungary, but as of 2023 it has not been connected to Hungary.

Slovenia's electricity consumption on 4 May 2024 entirely from

This would allow us to store more energy during those hours of the day when generation exceeds consumption and use it when generation is lower than consumption. During this Government's term, Slovenia has achieved incredible growth in solar energy use, more than doubling its total capacity from 1 June 2022 to the end of 2023.

TRANSMITTING ENERGY, MAINTAINING BALANCE.

The balance between the generation and offtake of electric power from the transmission network is achieved by using the leased system services and purchasing or selling energy for balancing. Thus, deviations between offtake realisation and the plan do not endanger the safe operation of

the transmission network and the supply of electric power
