Dangerous goods cabinet Andorra

Overview

What are dangerous goods cabinets?

Jaybro does not warrant the accuracy, content, completeness or suitability of the information on this site (or any site owned by the Jaybro Group) for your individual purposes. Dangerous goods cabinets are typically steel cupboards that are specifically designed to store flammable liquids, oils, fuels, paints and solvents.

Which dangerous goods cabinets are available for professional laboratory work?

TPE has created a range of dangerous goods cabinets available for professional laboratory work. These cabinets are suitable for the storage of class 3, 4, 5.1, 6, and class 8. Standard cabinets are available in a range of different sizes and custom cabinets can also be designed to suit your requirements.

What is a corrosive substance storage cabinet?

This range of cabinets is for the storage of Corrosive Substances in liquid or solid as classified by the United Nations criteria and the ADG Code for Dangerous Goods. These include chemicals such as: Acids, Alkalis, Caustics, Sodium Hydroxide Solution, Hypochlorite Solution etc.

Where should 'small quantities' of dangerous goods be stored?

The Safe Work guidelines state that 'small quantities' of dangerous goods, as designated by Australian Standards and the ADG or Australian Dangerous Goods Code should be in a designated area, location or cabinet on your premises.
