Do photovoltaic panels sell directly or through distributors

Overview

Gone all those days when manufacturers were dealing only with retailers and wholesalers to move their products to the consumer end. All thanks to the Internet, it has made things simpler and now, people can access product manufacturers more easily. First of all, the most important fact is the manufacturer of a.

If the manufacturers go for distributor-based selling, then there are multiple sales channels that include wholesalers, retail stores, international dealers to reach a wider audience, and.

How do solar panels & battery manufacturers sell their products?

The solar panel and battery manufacturers sell their products in two ways: directly to the end-user or through a number of authorized distributors. However, the key advantages and disadvantages of buying products directly from the manufacturer include: 1. Lower Costs I'd say that's probably the only benefit.

Should you buy solar panels directly from a manufacturer?

However, the key advantages and disadvantages of buying products directly from the manufacturer include: 1. Lower Costs I'd say that's probably the only benefit. When you want to buy at least 1-2 40Ft container of solar panels, you bet you can get them at very cheaper prices. 2. Having a hand on the pulse of the supply chain.

Who is a solar distributor?

In many cases, the answer is a solar distributor. Solar distributors are a major component of the solar industry. Though invisible to most solar shoppers, they factor heavily into the value chain overall.

Who distributes solar panels in North America?

Major North American distributors include BayWa r.e., CED Greentech, Freedom Solar, Wesco, and Soligent. Solar panels can take many different paths to find their way onto your rooftop, but we've included a relatively

simplified illustration below, highlighting the primary functions of manufacturers, distributors, and installers.

Are solar distributors a part of the value chain?

For most solar consumers, solar distributors are (and will continue to be) a largely hidden part of the value chain: When you receive quotes from local or national installers on EnergySage, you can compare different types of equipment from other manufacturers.

Why do you need a solar distributor?

Distributors play a critical role in the solar industry by helping the right solar solution get to the right installer at the right time. For instance, a solar distributor can alleviate the need for individual solar installers to carry large amounts of equipment inventory.

Do photovoltaic panels sell directly or through distributors
