Overview

Will Kosovo and North Macedonia declare an energy emergency in August?

As EU leaders scramble to maintain their energy supplies for the coming winter, at least two Western Balkans states – North Macedonia and Kosovo – will declare an energy emergency in August, in anticipation of shortages during colder months. The covid-19 pandemic caused a significant economic shock in the Western Balkans.

Are coal-fired power plants a problem in the Western Balkans?

Most states in the Western Balkans rely mainly on coal-fired power plants to meet their energy needs. The use of these plants jeopardises their ability to fulfil the commitments outlined in the European Green Deal – one of which is a 55 per cent reduction in carbon emissions (compared to 1990 levels) by 2030.

Will the Western Balkans emerge from the energy crisis unscathed?

Nonetheless, high prices for imported electricity mean that the Western Balkans will not emerge from the crisis unscathed. Several states in the region are vulnerable to these rising costs – particularly as winter approaches and demand for energy rises.

Emergency power storage Bosnia and Herzegovina

Economic benefits of PHS and Li-ion storage. Study

Bosnia and Herzegovina, in addition to Austria, has valuable interconnections and competitive advantage with an energy generation mix consisting of thermal and hydropower plants. Since in Austria, new locations for pumped hydro storage power plants are scarce, Li-ion batteries could only be a substitute for other flexibility measures if the

Bosnia's Energoinvest puts into operation power line in Tanzania

4 ???· The transmission line extends from Arusha in Tanzania to Isinya in Kenya, passing through Namanga, and interconnects the power grids of both countries, Energoinvest said in a press release on Friday. Energoinvest built the line as part of a deal with Tanzania Electric Supply Company Limited (TANESCO) worth \$40 million (38.1 million euro), it

Bosnia and Herzegovina, EPBiH has launched a tender for the

State-owned power utility EPBiH has launched a tender for the selection of a contractor for the construction of 15 MW solar power plant Gornja Breza. According to tender documentation, the value of the contract is estimated to some 11.2 million euros. The solar power plant should be built on the abandoned landfill of Breza coalmine.

Bosnia and Herzegovina

Electric power is primarily generated in coal-fired thermal and large-scale hydro power plants and the country is a net exporter of electrical energy. The generating capacity is about 17,000 GWh. BiH historically had a comparative advantage in electricity, particularly because of its natural hydropower resources and coal reserves.

About us

MOON POWER is an innovative subsidiary of Porsche Holding Salzburg that develops intelligent, data-driven energy solutions for companies. As we believe in the necessity of the Paris climate targets, our goal is to be a major player in the world of e-mobility.. In addition to selling our charging stations, battery storage and photovoltaic systems, we are the central contact in ...
