Energy saving home improvements Kosovo

Overview

How can Kosovo improve its energy sector?

The Group's commitment to helping Kosovo improve its energy sector is broad: projects are designed to improve energy efficiency, ease the policy and regulatory environment for renewable energy and energy efficiency, address the environmental legacy of the old power plants, upgrade power generation to meet demand, and improve water supply.

Will Kosovo use solar energy for district heating?

In late December 2022, Kosovo became the first country in the Western Balkans Economy to use solar energy for district heating. Kosovo's Minister of Finance, Labour and Transfers, Hekuran Murati, said the project would ensure access to the central heating system for about 38,000 citizens.

Is Kosovo a member of the EU Energy Community?

As a member of the EU Energy Community, the country has committed itself to implement the energy chapter of the EU acquis. Hence, by 2030 the Government of Kosovo is aiming to reduce energy consumption by 32.5 per cent compared to projections, in orientation to the EU energy efficiency target.

What are the challenges facing Kosovo?

Ensuring a reliable and affordable energy supply in the country is a high priority for the Government of Kosovo and a necessity for economic growth. However, the country is facing enormous challenges from a rising demand for electricity and heating, while the existing power plants have limited capacities and are showing supply bottlenecks.
