Sustainable Energy Vision for Estonia

The annual wind energy resource curve follows quite well the annual electric energy consumption curve in Estonia. In the best areas in Estonia, concerning wind energy potential, it is

possible by using 1.5 MW wind turbines to produce annually up to 40 GWh of electric energy from a surface area of one square kilometre.

Vision2050

In line with INFORSE's global vision for sustainable energy, the Estonian Vision is based on increase of energy efficiency. A number of studies have shown that with best available technology, on the market or close to market introduction, it is ...

What We Do

Energy Vision teaches students about the various dimensions of food waste, including the inedible portion that cannot be redistributed. We adhere to the U.S. EPA's Food Waste Hierarchy and international goal to reduce the amount of wasted food 50% by 2030. For the inedible food that cannot be consumed, we are committed to advancing the

Estonia National Development Plan of the Energy Sector until 2030

The NDPES 2030 describes the vision for the development of Estonia's energy sector and selects the optimal solution paths for individual sectors, based on the overall objective of ensuring ...

Research and Reports

This Energy Vision report lays out the ambitious plans New York City has made to reduce the greenhouse gases and air pollution generated by city truck fleets and shows clearly the contribution a diesel phase-out strategy can make--putting NYC right at the leading edge of sustainable heavy-duty transport. It should be a valuable resource to

DECIDE , Estonia

TREA is energy agency located in Tartu, Estonia, providing services to citizens, SME-s and municipalities. TREA consists experts on energy efficiency, energy planning, sustainable transport, energy renovation and energy communities. TREA supports the energy transition of South Estonian region but also in other regions and national level.

What We Do

What We Do Risk Management Each organization should have defined risk objectives. We work with our clients to develop & define energy management objectives and implement strategies to achieve those goals. Whether our team of advisors is focused on financial & physical hedging, evaluating fuel arbitrage opportunities, optimizing capacity assets, or eliminating risk with spot ...

National Energy and Climate Plan

Estonia eyes billion-euro investment with Europe's largest green

Estonia's Climate Minister and Minister of Economy and Industry met with representatives from the Dutch company Power2X, confirming that plans are underway for Europe's largest green methanol plant.

Estonia: Energy Country Profile

Estonia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
