Equatorial Guinea power energy

Overview

How much energy does Equatorial Guinea use?

Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe). The country produces all of the energy it consumes. As of 2012, renewable energy accounted for 29.2% of the final energy mix.

Why is energy in Equatorial Guinea declining?

Energy in Equatorial Guinea is an industry with plenty of potential, especially in the fields of oil and natural gas. However, production has been declining in recent years due to under-investment and lack of new discoveries. In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data.

What transformations are taking place in Equatorial Guinea in 2022?

No data for Equatorial Guinea for 2022. Another important form of transformation is the generation of electricity. Thermal power plants generate electricity by harnessing the heat of burning fuels or nuclear reactions – during which up to half of their energy content is lost.

How much oil does Equatorial Guinea produce a day?

In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data. Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe). The country produces all of the energy it consumes.

Why is oil production declining in Equatorial Guinea?

However, production has been declining in recent years due to under-investment and lack of new discoveries. In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data. Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe).
