

## Solar Energy South Africa

# Essential solar Namibia

## Overview

---

What are Namibia's energy goals?

Nonetheless, Namibia has ambitious goals. By 2030, it wants to produce 70% of its energy from renewable energy sources, with independent energy producers feeding renewable energy into its national grid. In northern Namibia, a ten-hectare solar energy farm produces 9,000 MWh of energy per year.

Is Namibia a good country for solar energy?

With an average of ten hours of sunshine per day, Namibia is one of the world's sunniest countries. It has enormous potential for solar energy yet, 60% of the country's energy is imported from neighbouring countries and 40% of its population is disconnected from the grid. Nonetheless, Namibia has ambitious goals.

What is a ten hectare solar energy farm?

In northern Namibia, a ten-hectare solar energy farm produces 9,000 MWh of energy per year. Producing power since July 2018, it was developed with the support of ClimatePartner. The project is helping increase the proportion of renewable energy sources in Namibia's energy mix and improve regional and national supply. vsl. TÜV NORD CERT GmbH.

Can Namibia's solar PV capacity be expanded?

HopSol spoke with ECP about how Namibia's solar PV capacity can be expanded and further integrated with the national grid.

Why do we need a green hydrogen industry in Namibia?

When you look at the recent oil and gas discoveries in Namibia, as well as green hydrogen initiatives, you will see drive and growth in this economy. A lot of people will come to Namibia, and from an energy point of view, we will see growth in energy demand. Therefore, we need to have industry

participants gearing up and preparing for this growth.
