# Find a photovoltaic panel glue master

## Overview

---

What is the best adhesive for solar panels?

Sikaflex 554 Adhesive for Mounting Solar Panels. White. Sikaflex 554 is a super-strong solar panel adhesive. It is the most suitable adhesive for securing solar panels of all kinds to your motorhome, boat or caravan. Sikaflex 554 is the new replacement for Sikaflex 252i. Solar panel adhesive. Sikaflex 554. White.

How does Sikaflex solar panel adhesive work?

Sikaflex solar panel adhesive will withstand the most extreme weather conditions. Each tube contains enough adhesive to secure any of our semi-flexible solar panels and most of our marine solar panels. One tube is also enough to glue one set of corner mounts, one pair of short-side mounts and one roof connection gland to your motorhome roof.

Can you use adhesive on solar panels?

I strongly urge you to avoid using any adhesive for solar panels. Keep in mind that flexible solar panels don't last long. You will probably need to replace them every couple of years. That will be a challenge with them glued in place. For rigid panels, the best adhesive would be M6 bolts.

How do I attach a solar panel to my motorhome?

If you are using our solar panel corner mounts to attach a solar panel to the roof of your motorhome, this is the best adhesive available. Use it to secure a marine or semi-flexible solar panel to the deck or wheelhouse of your boat.

How much adhesive do I need for a solar panel bracket?

If you're using adhesive you want as much surface area connection between the bracket and the roof. A couple inches of bracket may not be enough. Using adhesive under Unistrut that matches the full length of the solar panels is much better. But I'm a lot more comfortable with actual fasteners.

What is the best adhesive for rigid panels?

For rigid panels, the best adhesive would be M6 bolts. These are rigid panels being mounted on aluminium brackets. I'll actually be replacing one of the factory panels and notice they only use adhesive. M6 bolts make sense for strength, my concern is they introduce an entry point for moisture.
