[Frequently Asked Questions](#)

What is Fisonic Device? The Fisonic Devices (FDs) are supersonic, condensing heat pumps with a patented internal geometry which causes steam and water to mix and accelerate, converting a minute fraction of fluid's thermal energy to physical trust (pump head) with the outlet pressure higher than the pressure of the working medium at the inlet of the device.

Fisonic Technology . Fisonic technology harnesses the natural phenomenon of two-phase flow. At the core of the technology is a hyper-

efficient heat exchanger that produces thrust. Fisonic devices are heat exchangers, pumps and mixers with patented internal geometry. They mix steam and water by direct contact without consumption of mechanical

FISONIC ENERGY SOLUTIONS

Fisonic Energy Solutions TECHNOLOGY
 FisonicMax Hot Water System DEMONSTRATION
 SITE(S) DOHMH Public Health Lab, 455 1st
 Avenue, New York, NY DEMONSTRATION PERIOD
 December 2016 - November 2017 Optimum
 Facility Characteristics The FisonicMax can be
 used to make hot water, power, or both. in
 buildings that have one or more of the following

Fisonic Energy Solutions Company Profile , Management and

Fisonic Energy Solutions LLC is an energy service company that utilizes new technology to provide clean and efficient energy solutions across a broad spectrum of industries and applications including, waste heat recovery, commercial heating, and power generation. All of our systems are manufactured in New York and designed to deliver maximum

The Fisonic Devices (FDs) are supersonic, condensing heat pumps with a patented internal geometry which causes steam and water to mix and accelerate, converting a minute fraction of

fluid's thermal energy to physical trust (pump head) with the outlet pressure higher than the pressure of the working medium at the inlet of the device.

UScleanAir Air purification to meet CDC reg prevent cross

oFisonic system recovers all the energy in the waste condensate and adding just a fraction of the steam required by its controller to meet the building needs. Exhaust Air Energy Recovery o UScleanAir Energy recovery system on fresh air intake/building exhaust ducts. This allows preheating outside air in winter (cooling in summer).
