

Solar Energy South Africa

Free Solar Power Cooperation

Overview

What makes the Big Solar Co-op unique?

Even with its distinctive volunteering and financial model, it is the co-op's exceptional ethical nature that sets them apart from most other community solar groups. The Big Solar Co-op is committed to ensuring their ethical sourcing policy is implemented throughout the life cycle of each of its projects.

Who is the Big Solar Co-op?

The Big Solar Co-op is a Co-operative Society registered with the Financial Conduct Authority no. 4877. We are incubated by Sharenergy Co-operative Ltd and supported through startup grants from:.

How can thrive renewables help community energy organisations?

Thrive Renewables will finance community energy organisations to help them acquire renewable energy technology. They have already supported communities with a £12 million investment into wind and solar projects across the UK. They can structure their investment as pure acquisition, joint ventures or mezzanine loans also.

Could a new solar PV Grant help reduce CO2?

There is a huge push for CO2 reductions to be made, but whilst heat pumps will achieve this, they could see more low-income social tenants pushed deeper into fuel poverty, so this new solar PV grant opportunity will help to overcome this dichotomy by generating up to £500 of free electricity for the tenant a year".

Can the government amplify the benefits of rooftop solar?

At CPRE, we believe that much more can be done by the government to amplify the benefits of solar energy for the environment and local people. This is why we are calling on the government to fully realise the potential of

rooftop solar by asking MPs to become Rooftop Solar Champions and support our work in parliament.

Will a UK solar farm be built without government subsidy?

The solar farm will be the first in the UK to be built and operated without Government subsidy, following a fall in the cost of solar panels by two thirds since 2010. To date the industry has successfully installed 12GW of solar capacity across the country.
