

Solar Energy South Africa

Free energy solution Antigua and Barbuda

Overview

How much does electricity cost in Antigua and Barbuda?

This profile provides a snapshot of the energy landscape of Antigua and Barbuda, an independent nation in the Leeward Islands in the eastern Caribbean Sea. Antigua and Barbuda's utility rates are approximately \$0.37 U.S. dollars (USD) per kilowatt-hour (kWh), which is above the Caribbean regional average of \$0.33 USD/kWh.

How can Antigua and Barbuda reduce energy costs?

Antigua and Barbuda's electricity tariffs are among the highest in the Caribbean region. Allowing private sector participation in the renewable energy market and diversifying the energy matrix in line with the National Energy Policy can bring significant cost reduction.

What is Antigua & Barbuda's energy policy?

Antigua and Barbuda published a draft of its National Energy Policy in December 2010, with the dual goals of reducing energy costs by diversifying away from fossil fuels and driving development of new technologies and sectors.

Who owns the power in Antigua & Barbuda?

Under the terms of the deal, the Antiguan government will retain a 51% share in WIOC.¹⁰ Antigua and Barbuda's generation resources are owned primarily by APUA, with the remainder owned by the sole independent power producer (IPP) currently in operation— Antigua Power Company Limited (APC); other IPPs are allowed but none exist to date.

Can a wind power plant be used in Barbuda?

Another case is the large wind energy potential on Barbuda, which could easily satisfy the local energy needs—the island is currently served by a 7.2-MW diesel power plant.²¹ Inter-connections to nearby islands could

increase the potential benefits from this wind resource and spread them to other parts of the country as well.

Free energy solution Antigua and Barbuda

Efficient Higher Revenue

- Max. Efficiency 97.2%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPP Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

Intelligent Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart 1V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Surge SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, UPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. Current Inverter Thermal
- AFCI Function (Optional): when an arc-fault is detected the inverter immediately stops operation
