CE4EUislands Workshop in Tahiti Tackles Energy Transition

In a three-day event held from 19 to 21 March 2024, the Clean energy for EU islands secretariat convened stakeholders in Puna'auia, Tahiti, French Polynesia. The workshop aimed to address the pressing technical and legislative hurdles hindering the energy transition in French

Overseas Territories.

Energy is Essential

Clean Energy. In addition to adding renewables at a record pace, regulated markets value carbon-free nuclear energy and its long-term benefits to customers. For example, Georgia has ranked in the top 10 states for solar energy for four consecutive years and is also the only state in the nation expanding new nuclear energy.

The Clean Molecules for the Energy Transition

The course provided a good insight into future energy solutions based on clean molecules. The course program covered strategic, technical, regulatory and economic issues on a specific topic. The meeting with experts in panel discussions was a good opportunity to discuss current issues with industry decision-makers.

Clean Energy Quiz

Outstanding work! You are an energy master! This quiz proves your advanced knowledge about energy. Non-renewable energy excites you and you are driven to learn more about it. You probably are always on the look out for green solutions in your life and hope to see more clean energy solutions being used everywhere. Great job!

Axpo secures 163MW in French renewable energy tenders

Axpo has secured a combined capacity of 163MW in recent public tenders for solar and wind energy organised by the French Energy Regulatory Commission (CRE), the results of which were announced in November 2024. The projects are expected to contribute significantly to local renewable energy supply and align with France's ambitious energy targets.

France sets sail for 32% renewables in energy mix by 2030

The law on energy transition for a green growth, as the bill is called, also targets to halve the country's overall energy consumption by 2050, decrease the share of nuclear energy in the energy mix to 50% by 2025 and lower the share of fossil fuels by 30% by 2030. Progress will be measured against the 2012 levels.

Black & Veatch's 2024 Water Report , Black & Veatch

Based on a survey of nearly 630 U.S. water stakeholders, Black & Veatch's 2024 Water Report offers a comprehensive look into the issues and trends facing the water utility industry today. In this 13th edition of our report, our annual examination measures industry progress, market shifts and emerging challenges and headwinds.
