Overview

France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers for small-scale solar PV up to 100 kWp on rooftops for self-consumption, with a specific grid tariff for collective users and exemption from the domestic tax on electricity for projects under 1 MW. However, a proposal to reduce solar PV subsidies for ongoing projects until 2030 has created controversy, affecting the sector's growth.

Does France have a solar energy sector?

The exponential growth of the solar photovoltaic energy sector in France has never stopped since its inception in the early 2000s. In 2022, the PV energy capacity in France amounted to approximately 17 gigawatts, making France the fifth European country for cumulative PV capacity that year.

Is France a good country for solar power?

In 2016, France was ranked 4th in the EU by installed capacity and 14th in terms of PV capacity by inhabitant at 107.3 Wp/Inhab compared to the EU average of 197.8 Wp/Inhab for the year. The country's largest completed solar park to date was the 300 MW Cestas Solar Park.

Is EDF set to commission its first floating solar array in France?

September 12 - EDF is set to commission its first floating solar array in France early next year, marking an expansion in market activity from disused quarries to the country's vast array of hydroelectric sites.

How do municipalities contribute to the growth of photovoltaics in France?

Municipalities and local governments continue to be active participants in the growth of photovoltaics in France, both investing in projects, experimenting innovative projects (particularly collective self-consumption and the projects to facilitate grid integration), and facilitating citizen investment and grid integration.

Is EDF developing floating solar power in France?

EDF, France's state-controlled power utility, will commission 20 MW of floating solar capacity at its Lazer hydroelectric facility in the Southern Alps and is developing other projects in France and abroad, it said.

Does France really need a fully integrated PV system?

France has, for the past 10 years, strongly encouraged fully building integrated PV, with preferential feed-in tariffs and access to Tenders, only being phased out over 2017/2018.

French Southern Territories pv array power

Pacific Energy to support US NAVFAC's photovoltaic array project

In what is said to be the US Navy's largest photovoltaic array in the Pacific, Pacific Energy will build three roof tops and one ground-mount location on Waipio Peninsula at the Joint Base Pearl Harbor Hickam (JBPHH), six roof tops and two elevated PV structures at the Marine Corps Base Hawaii, and one roof top and one elevated PV structure at Camp Smith, Aiea.

Solar Installation Technician Training , Hands-On Photovoltaic Skills

Amatrol's Solar PV Installation Learning System (950-SPF1) teaches the installation and commissioning of grid interactive and stand-alone photovoltaic (PV) systems for commercial and residential applications through a unique combination of eLearning curriculum and hands-on experience with real industrial solar PV components

Solar array maintenance: why are costs falling

Maintaining solar photovoltaic (PV) operations may typically be considered simpler and cheaper than competing energy sources, such as wind power and natural gas; however, the relatively small profit margins associated with solar makes it necessary to keep operations and maintenance (O& M) costs to a minimum to keep projects

commercially viable.

Inside the world's largest dam-based floating solar power project

The biggest of its kind to be given the green light so far is a 41 MW floating photovoltaic (PV) power plant at the Hapcheon Dam in South Korea. Seoul-headquartered Q- CELLS won approval for the project from K-water (the Korea Water Resources Institute) in November and say it will become the world's largest floating PV constructed on a dam

Siemens connects 31MW Les Mées solar farm to French grid

Siemens Energy has connected the 31MW Les Mées solar farm in southern France to the grid. The farm, which is owned by Eco Delta Développement (EDD) and comprised of six separate turnkey systems

AMEA Power to build 1GW solar PV project with 600MWh BESS in ...

AMEA will also expand its 500MW Abydos solar PV power plant, currently under construction, by adding a 300MWh utility-scale BESS. The developer will invest around US\$800 million in the two new

Investment and PPA deal for Lightsource bp Texas PV projects

PV Tech has been running PV ModuleTech Conferences since 2017. PV ModuleTech USA, on 17-18 June 2025, will be our fourth PV ModuleTech conference dedicated to the U.S. utility scale solar sector.

"Golf ball-sized" hailstorms damage Fighting Jays solar project

The project was damaged amid a storm that tore the roof from one local resident's house. Image: Fighting Jays. Hailstorms have damaged the 350MW Fighting Jays solar project in south-east Texas

Solar PV Array Station Training , Adds to the 850-AEC

The Solar PV Array Station can be added onto the Alternative Energy Learning System - Wind and Solar (850-AEC), Alternative Energy Learning System - Solar (850-AES), or Solar Energy Learning System (85-SE). This system includes a mobile frame with adjustable angle, solar panels,

and an interface cable.
