

Solar Energy South Africa

French Southern Territories solar panel installations

Overview

At the outset it is important to define the term 'solar panel' as there are two types of panels, which are frequently confused with one another. These two types are: 1. Thermal solar panels (solaire thermique) and 2. Pho.

Since 1st January 2014 there are no longer any tax credits available for the installation of photovoltaic solar panels. Nevertheless, in France, as in many other countries, there are incentives in.

The costs of installing photovoltaic solar panels will vary by region and type of property. However, as a rule of thumb, the French energy management agency 'ADEME' consider.

Just how much income you can earn each year will depend on the size, orientation and location of the installation. Clearly, the further south is the property, then the greater the income.

The good news is that income generated from photovoltaic installation no greater than 3k/W is exempt from income tax and social charges, provided the income is not part of a profession.

How many solar panels are installed in France?

Solar panel installations are increasing in France with the last year seeing over 200,000 installations across the country as prices fell. This includes installations from both professionals and from DIY kits, which allow homeowners to set up the panels by themselves. Read more: Why record numbers of homeowners in France are installing solar panels.

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

Can you have solar panels on a property in France?

Other rules may apply if your property in France is located in certain historic areas. Read more: [Can you have solar panels on homes in historic areas of France?](#)

You will also need to contact Consuel for an Attestation de Conformité to confirm your installation is safe to be connected to the main power grid, which costs €180.

How many solar panels did France install in 2023?

From pv magazine France France deployed around 921 MW of new PV systems in the fourth quarter of 2023, according to new figures released by French grid operator Enedis. For all of 2023, the country added 3,135 MW of new solar capacity. The results represent a 30% increase from 2022, when around 2.6 GW of solar was installed.

Are there grants for solar panels in France?

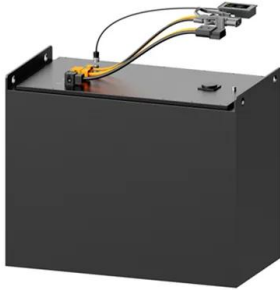

There are also grants available for energy conservation (but not photovoltaic solar panels) as part of the home improvement grant regime 'MaPrimeRénov' run by Anah, the housing renewal agency, but these are means-tested. [How much does it Cost to install Solar Panels in France?](#)

.

Are there tax credits for solar panels in France?

Since 1st January 2014 there are no longer any tax credits available for the installation of photovoltaic solar panels Nevertheless, in France, as in many other countries, there are incentives in place for property owners to sell electricity back into the grid at preferential prices.

French Southern Territories solar panel installations

What aid is available to install home solar panels in France in 2024?

Installation of solar thermal panels and combined solar panel systems (système solaire combiné) can be eligible for the MaPrimeRénov home renovation scheme. Funding can reach up to EUR4,000, or EUR10,000 for a combined system, which is much more expensive to install.
