

## Solar Energy South Africa

# Genz powern Angola

## Overview

---

What are the options for power generation in Angola?

Angola has numerous options for the generation of power. The present document considers the key options - hydro, thermal and new renewable- individually and combined in scenarios that meet the required levels of safety and redundancy.

How much power does Angola need?

In order to ensure a safe power supply, even in years of lower hydro flow, Angola should have 9.9 GW of installed capacity - through increasing power capacity in all sub-systems and through a strong reliance on hydro and gas (which will correspond, respectively, to 66% and 19% of installed power capacity).

How many power plants are in Angola?

Generation Capacity With a current installed capacity of approximately 5,01 GW, three power stations primarily power Angola; Laúca (1000 MW), Capanda (520 MW) and Cambambe (960 MW), as hydroelectric plants generate nearly two-thirds of Angola's electricity. Meanwhile, the Luanda OCGT power plant is the only operating gas turbine in the country.

How much power will Angola have in 2025?

GENERATION In order to meet the expected power demand in a secure way, even in years of less water flow, Angola will have in 2025 around 9,9 GW of installed power, with a strong focus on hydropower and natural gas.

Which OCGT power plant is the only operating gas turbine in Angola?

Meanwhile, the Luanda OCGT power plant is the only operating gas turbine in the country. To meet rising demand, Angola will install 9,900 MW of capacity, with a focus on natural gas and hydropower.

Can Angola benefit from a high level of renewables?

The high level of renewables will also allow Angola to benefit from one of the world's lowest power sector emission factors – 98 g CO<sub>2</sub>/kWh. POWER PLANTS UTILIZATION AND ENERGY SECURITY The operation of the installed generation plants will greatly depend on the hydrologic conditions (Figure 58).

### Angola , Power Africa

Angola's power sector is characterized by its two main natural resources, petroleum and hydropower. The country has three vertically integrated but overlapping utilities: Empresa Nacional de Electricidade (ENE), Empresa de Distribuição de Electricidade (EDEL) and Gabinete de Aproveitamento do Médio Kwanza (GAMEK). The latter, GAMEK, is concerned primarily ...

**Scalable Energy Storage Solutions · genZ**

The gen Z engineering team are based in Australia working as one with the commercial team, service team, quality assurance team and component suppliers. This approach ensures products that are not only fit for purpose but provide a cost-effective high-quality solutions.

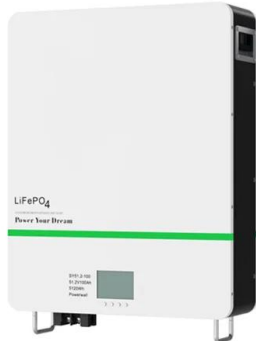

**Home Energy Storage (Stackble system)**

High Efficiency    Easy installation    Safe and Reliable    Perfect Compatibility

**Product Introduction**

- Scalable from 10 kWh to 50 kWh
- Self-Consumption Optimization
- Integrated with inverter to avoid the compatibility problem
- LFP battery, safest and long cycle life
- Stackble design, effortless installation
- Capacity of High Power and Emergency Backup and Off-Grid Function

### **Hydropower to continue to dominate Angola power generation ...**

With hydropower being the primary source of power generation in Angola and potential likely to be exhausted, hydropower is expected to come down from 71.3% in 2021 to a share of 65.5% in 2035 in its total annual generation. However, the government has set a target of 9.9GW of total installed capacity, with a 60% electrification rate by 2025.
